

Vexve AM CTS

Compact controller for maintaining desired supply water temperature

- Suitable for maintaining a constant supply water temperature in Hydronic floor heating and air-conditioning applications as well as various process applications, easy installation without special tools
- Delivery includes a control for a single heating circuit
- All settings can be made and read directly from the controls on the front panel of the unit
- Stepless temperature adjustment: 10 °C – 80 °C
- Valve turning direction and loop speed control

Properties

- All settings can be made and read directly from the controls on the front panel of the unit
- 18 VAC supply voltage (low-voltage equipment, installation does not require an electrician)
- The controller is integrated with the motor section (IP41)
- 2 sensor inputs, RJ11/RJ12
- Motor unit 24VAC / 140s / 90 ° / 5Nm / 3-point control
- Mechanical setting ensures that settings are maintained in the event of a power failure
